1. Permitir selección de categorías por nombre:

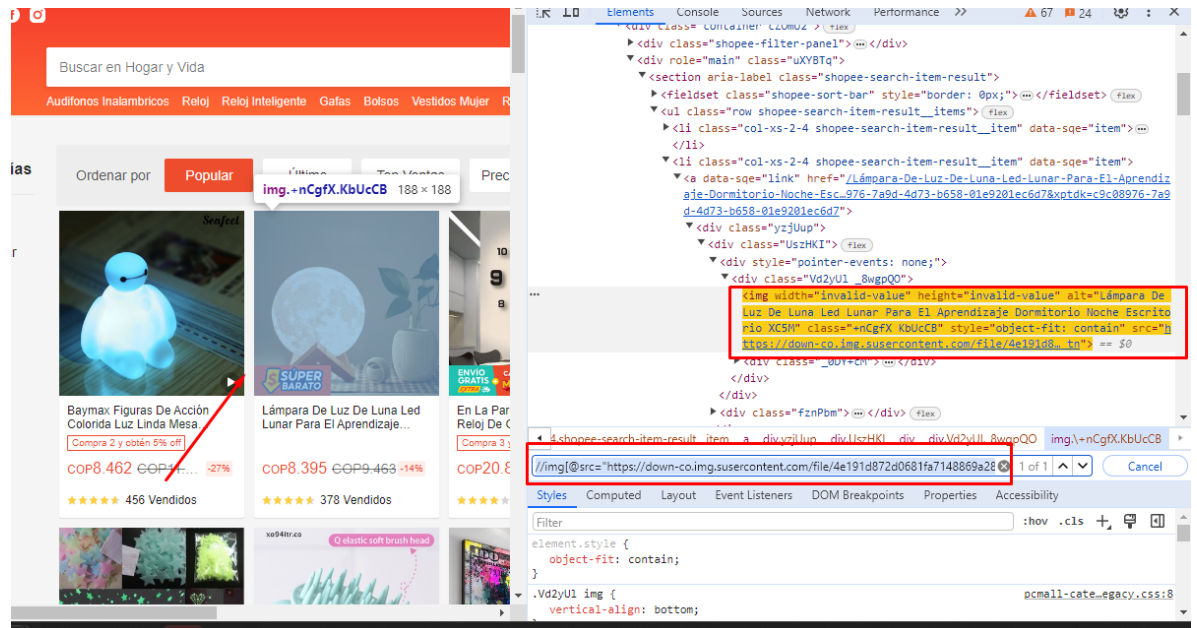

The screenshot shows the Shopee website interface. At the top, there's a navigation bar with links like 'Descargar', 'Síguenos en', 'Notificaciones', 'Ayuda', 'Español-Colombia', 'Regístrate', and 'Iniciar Sesión'. Below this is a search bar with the text '¡Regístrate y obtén un cupón de envío gratis!' and a search icon. The main content area displays a grid of product categories: Celulares y Gadgets, Hogar y Vida (highlighted with a red box), Accesorios de Moda, Madre y Bebé, Moda para Bebés y Niños, Herramientas para el hogar, Joyas y Relojes, Belleza, Ropa de Mujer, Deportes y Fitness, Computación, and Juguete Hobby. At the bottom, there's a promotional banner with various products and discounts.

On the right side, the Chrome DevTools console is open, showing the HTML structure of the page. A red arrow points from the 'Hogar y Vida' product card in the grid to the corresponding HTML element in the console, which is a <div class='image-carousel-item'> tag. Another red arrow points from the same tag to the <div class='_0qFecF'> tag, which is the actual product card element.

```
//a[@class="shopee-category-list__sub-category" and text()="Iluminación para el Hogar"]
```

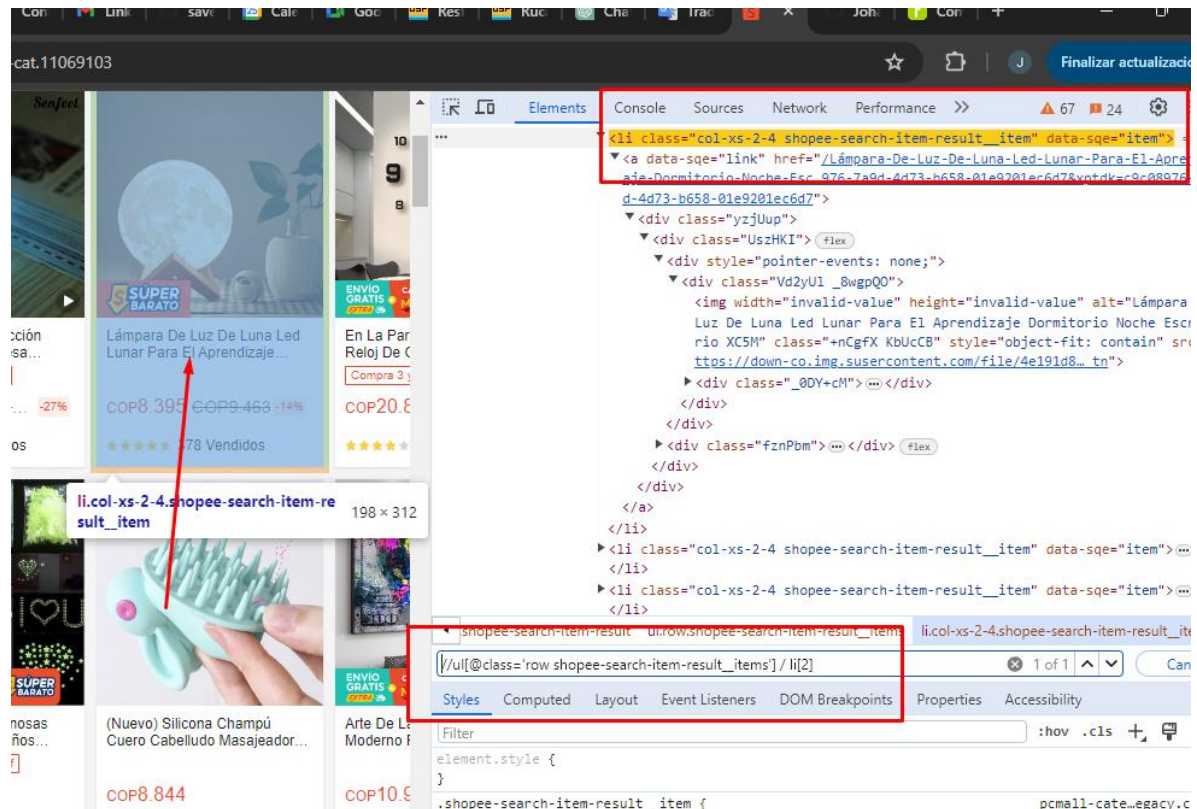

3. Seleccionar image

//img[@src="https://down-co.img.susercontent.com/file/4e191d872d0681fa7148869a28e034f2_tn"]
